About Maa Omwati International Education City

Maa Omwati International Education City, is established at Hassanpur, (Palwal) with the objectives to provide excellent learning facility, educational assistance by experienced faculty and all other allied infrastructure to groom the youth and all round development of this area. Our mission is "To see India as super power and bring up and develop the village talent by introducing excellence in the field of education.

In Maa Omwati International Education city various colleges are running under one umbrella i.e Maa Omwati College of Education, Maa Omwati Degree College, Maa Omwati Institute of management and technology and one school i.e Maa Omwati Global Senior Secondary School. The main objectives of this institution are to develop a skill to stimulate experience and knowledge among students. It is established to promote quality education, research, training and consultation in teacher training with a global prospective to meet the challenges of the fast changing trends in the field of education. MAA OMWATI COLLEGE OF EDUCATION is running two programmes i.e B.Ed and B.P.Ed. This college facilitates rural girl's education and empowers the rural potential with its quality education. MAA OMWATI DEGREE COLLEGE is running various UG courses such as (BA, B.Sc. B.Com (pass, vocational), BBA, BCA and PG courses such as M.A (Hindi) M.A (English) M.A (History), M.A (Pol Sc) M.Com and in MOIMT MBA programmes is running in the campus. MOIEC is also established to uplift the education standard from root, that is the reason we have MOGSS SCHOOL in the campus. This MOGSSS is affiliated to CBSC board and is from nursery to 12th class.

About Seminar

Education is a process by which a person's body, mind and character are formed and strengthened. It is bringing of head, heart and mind together and thus enabling a person to develop an all-round personality identifying the best in him or her. Higher education in India has expanded very rapidly in the last six decades after independence yet it is not equally accessible to all. India is today one of the fastest developing countries of the world with the annual growth rate going above 9%. Still a large section of the population remains illiterate and a large number of children's do not get even primary education. This is not only excluded a large section of the population from contributing to the development of the country fully but it has also prevented them from utilising the benefits of whatever development have taken place for the benefit of the people. The world has realized that the economic success of the states is directly determined by their education systems. Education is a Nation's Strength. A developed nation is inevitably an educated nation. Indian higher education system is the third largest in the world, with 51,649 institutions. Education is the single most important factor in achieving rapid economic development and technological progress in all branches of national life education becomes the focal point of planned development.

The objective to organize seminar is

- To identify issues and challenges in the field of Higher Education in India.
- To find out the solutions to overcome these challenges with combined efforts of employers, youths, stakeholders i.e., students, Educational Institutions, NGO's, parents and Government

From the desk of Chairman

SH.J.B Goel (Maa Omwati International Education City)

I welcome you all whole-heartedly to our institution. The Maa Omwati group of institutions was started with the aim of imparting quality Teacher Education with a vision for tomorrow's need. We give top priority to discipline and knowledge. The Institution provides the necessary infrastructure and a team of qualified and motivated faculty all under one roof for the student community. We have created an excellent educational atmosphere. Added to this, to encourage sports activities among the students, we are offering a modernized gymnasium, as well as an indoor stadium suited to international standards. It gives me enormous pleasure that Maa Omwati college of Education, Maa Omwati Degree college and Maa Omwati institute of Management and Technology is organizing National Seminar on a theme, "Issues And Challenges In Higher Education And Suggestions To Overcome" on 12th May, 2023. I am honored and delighted to welcome you to the Seminar. Thanks to all my organizing members for a wonderful and stimulating Seminar on recent issues and challenges.

From the desk of Principal

Dr. Neelam Chauhan (MOCE)

India's higher education system is the world's third largest in terms of students, next to China and the United States. In future, India will be one of the largest education hubs. India's Higher Education sector has witnessed a tremendous increase in the number of Universities/University level Institutions & Colleges since independence. The vision of higher education in India is to realize the country's human resources potential to its fullest with equity and inclusion. The higher education sector, in recent decades, has witnessed a tremendous growth in many aspects such as institutional capacity, enrolment, teacher-student ratio, etc. The rapid expansion of the higher education system at the same time has brought several pertinent issues related to equity, efficiency, excellence and access to higher education in the country. India provides highly skilled people to other countries therefore; it is very easy for India to transfer our country from a developing nation to a developed nation.

From the desk of Principal (MODC)

Dr. A.K. Singh

Passing more than 75 Years of Independence, India's higher education system has still not been progressed fully. It is evidently said by its average performance in educational institutional ranking as compared to globe of the world, other common challenges are also we seen such as the gross enrollment ratio in higher education in India is just about 26 percent, which is quite low as compared to the developed and developing countries, the enrollments at the school level is increased whereas the supply of higher education institutes is insufficient to meet the requirement of the students in the nation. As far as concern to enhance the education structure, there is need to implement and transformational approach from basic to higher education level, improve quality, reputation and establish credibility through student exchange, faculty exchange programs, collaboration with high quality national and international higher education institute and focus on graduate students by providing them such courses in which they can achieve excellence, gain deeper knowledge of subject so that they will get the jobs accordingly. Further, in order to remove these challenges, the NEP 2020 may fulfill the objectives of higher education system in the nation and hope we go with main stream of the education of the world.

From the desk of Director (MOIMT)

Dr. Manisha Saxena

In order to promote economic and industrial development in a country, the essential requirement is the capacity to develop skilled manpower of good quality in adequate number. It is pertinent to mention here that at the beginning of India's independence, there were 20 universities and 591 colleges while student's enrolment at the tertiary level of education was 0.2 million. After independence, the growth has been very impressive. India now possesses a highly developed higher education system that offers facility of education and training in almost all aspects of human creation and intellectual endeavours. I am very happy that such a recent topic has been chosen for discussion

From the desk of Principal (MOGSSS)

Dr. Rekha Sharma

The Higher Education system is witnessing significant transformations and reforms. The globalization of economic activities and development in science and technology accelerate the emergence of new types of higher education institutions. On several occasions, however, resources have been found to implement significant new initiatives in higher education. I am glad to be the part of this seminar as in school new policy has been started in terms of NEP 2020. There is lots of challenges and issue which will come after the implementation of this policy. I wish the entire organizing member all the best for this event.

From the desk of Principal (B.P.Ed and Seminar Director)

Dr. Sangeeta Rani

Higher education means different things to different people. If we talk about higher education in terms of level, it means to gain higher educational qualification by the teaching-learning process in the higher educational institutes such as colleges and universities. Moreover higher education imparts knowledge, develops the student's ability and also gives him/her a wider perspective of the world around. India's higher education system is the world's third-largest in terms of students, next to China and the United States. Although 75 percent of higher education is in the private sector, the best institutions, IITs, IIMs, NITs, AIIMS, NLS, have all been set up by the government. India's Higher Education sector has witnessed a tremendous increase in the number of Universities/University level Institutions & Colleges since independence. Higher education system plays an important role for the country's overall development which includes industrial, social, economic etc. This National level seminar includes the key challenges that India is currently facing in higher education and also includes some initiatives taken by the government to meet those challenges. I am very delighted to organize on such a recent topic for discussion in Seminar. My best wishes to all my team members for success of the programme
